

Fueling the Lives of Louisianans

As one of the largest onshore producers of natural gas in Louisiana, with field offices in Bossier and DeSoto parishes, located at the center of the Haynesville Shale, Chesapeake is fueling the lives of Louisianans every day. Louisiana is the fourth-largest natural gas-producing state and is a global player in exporting that resource to world markets. In 2015, the oil and gas industry supported \$72.8 billion in sales to Louisiana firms, generated more than \$19.2 billion in household earnings and supported 262,520 jobs in the state. In 2017, the oil and gas industry paid \$688.7 million in Louisiana state taxes and fees with industry employees earning an annual average of \$96,500, almost double the average annual wage of the state.

Headquartered in Oklahoma City, Chesapeake's operations are focused on discovering and developing its large and geographically diverse resource base of unconventional oil and natural gas assets onshore in the United States. The company also owns oil and natural gas marketing and natural gas gathering and compression businesses.

OUR LOUISIANA INVESTMENT
