

Damage from excavation-related activities is a leading cause of pipeline accidents. By law and for your safety, you must call 811 at least 48 hours prior to beginning any excavation work.

The Federal Communications Commission has designated 811 as the national one call number. By calling 811, you are automatically connected to the one call center in the state where you are planning to dig. The one call center will notify Chesapeake and other pipeline and utility operators in the area of your planned excavation. If any of the companies' underground facilities might be affected by the excavation, a representative will be sent free of charge to locate and mark the buried facilities before you dig. Chesapeake typically marks all appropriate areas within 48 hours of receiving notification.

It is important to understand that different colored flags or paint are used to mark various types of underground utilities, including pipeline. Yellow is the color designated for pipelines transporting natural gas, oil and petroleum liquids.

WHEN SHOULD I CALL 811?

Before you excavate whether on commercial or residential property.

- » Digging
- » Blasting
- » Boring
- » Tunneling
- » Backfilling
- » Removing aboveground structures
- » Building a pool or fence
- » Widening a driveway
- » Planting a tree

UNIFORM COLOR CODE

For Underground Utility Line Marking

-  Proposed Excavation
-  Temporary Survey Markings
-  Electric Power Lines, Cables, Conduit and Lighting Cables
-  Gas, Oil, Steam, Petroleum or Gaseous Materials
-  Communication, Alarm or Signal Lines, Cables or Conduit
-  Potable Water
-  Reclaimed Water, Irrigation and Slurry Lines
-  Sewer and Drain Lines
